

X-MOD

The X-MOD is a solution that comprises a technical module and a folding table. Its interconnection lets you easily assemble a table in different ways.

It can be used for a range of applications and can incorporate a 19-inch motorised screen and connection boxes.

The unit is designed on casters for easy arrangement and to make each module independent.

Tech : Logitech Rally Bar above screen (ADT_R2RALLYBAR)
+ Arthur Holm DynamicX2 built into the module
